Launch of PHIS 2011 Health Data Tables on CD and the web

PHIS 2011 Data Tables on the Health Well website

www.thehealthwell.info

Lorraine Fahy, IPH
Presentation outline

• Part A:
  – Introduction to the Health Well website

• Part B:
  – Data on the Health Well

• Part C:
  – DoHC’s PHIS 2011 Data Tables
Part A:

Introduction to the Health Well website

www.thehealthwell.info
The Health Well

- Unique all-island health information website
- Promotes health and wellbeing
- Supports evidence informed decision making
  - Access information you need
  - Use information more effectively
  - Work collaboratively across the web
Welcome to the Health Well

Latest from the Health Well

29 March 2011

**Chronic Conditions Profiles** have now been added to the Health Well. The indicators in the Profile are available for every county in Ireland and every LGD in Northern Ireland. Being part of the Community Profiles tool of the Health Well, the indicators can be explored using interactive mapping and graphing tools. Go to [www.thehealthwell.info/community-profiles](http://www.thehealthwell.info/community-profiles)

People Finder

Spotlight on the news

IPH discussion paper calls for a North-South debate on food security
24 March 2011
The paper argues that population health, food systems and agricultural production are intimately linked, and called for a clear framework to support co-operation across the island.

Grey literature

- Interventions Catalogue
- Policy and Guidance Catalogue
- Research and Evaluation Catalogue

Journal Room

- Journal articles
- Open Access Journals
Part B:
Data on the Health Well

www.thehealthwell.info/data-centre
Data on the Health Well

- Promotes greater use of (numerical) data
- Population health and health & social care
- Wide range of summary data
- Suite of standardised tools to explore data
- Health Well allows users to link different types of information
Data Centre

The Data Centre aims to help you access, explore and present the (numerical) health and social care data you need. It:

- Holds a wide range of summary data
- Contains a standardised suite of interactive graphing and mapping tools to explore these data
- Signposts other health related data

COMMUNITY PROFILES:

Community Profiles include over 100 health related indicators collected for every County in Ireland and every Local Government District in Northern Ireland.

PHIS 2011 DATA TABLES:

Ireland’s Department of Health and Children (DoHC) disseminates its Public Health Information System (PHIS) on the Health Well. These tables cover mortality, births, hospital discharges, cancer registrations etc.

CHRONIC CONDITIONS DATABASE:

This database includes estimates and forecasts of the population prevalence of a range of chronic conditions, collated for every Local Health Office in Ireland and Local Government District in Northern Ireland.
Summary data

• DoHC PHIS 2011 Data Tables

• Community profiles
  – Health data at sub-national level

• Chronic Condition Prevalence Database
  – Stroke, hypertension, CHD, diabetes, chronic airflow obstruction
Standardised Data Tools

- Further explore the summary data tables in the same way

- Data tools allow users to map, graph and download the data

- Tools designed to help users answer questions

- Coordinated with data tools on PHIS CD
Data catalogue

• Provides users with details of other data sources

• Describes nearly 400 data sources held elsewhere

• Grouped into sub-catalogues such as primary data sources (e.g. SLAN) and secondary data sources (e.g. Eurostat health statistics)

Part C:
DoHC’s PHIS 2011 Data Tables

www.thehealthwell.info/phis-tables
PHIS 2011 Data Tables on the Health Well

- Health Well used to disseminate PHIS data tables on the web
- Same data tables on Health Well website as CD
- Tables placed in context of other relevant data and information
PHIS 2011 Data Tables on the Health Well

- PHIS tables on Health Well website and CD will be updated simultaneously
- Similar data tools for mapping and graphing
- A few differences e.g. charts
  - Funnel charts, Box plots, Scatter charts
